THE
DIFFERENCE

LIGHTWEIGHT PORTABLE ABI / SEGMENTAL VASCULAR SYSTEM

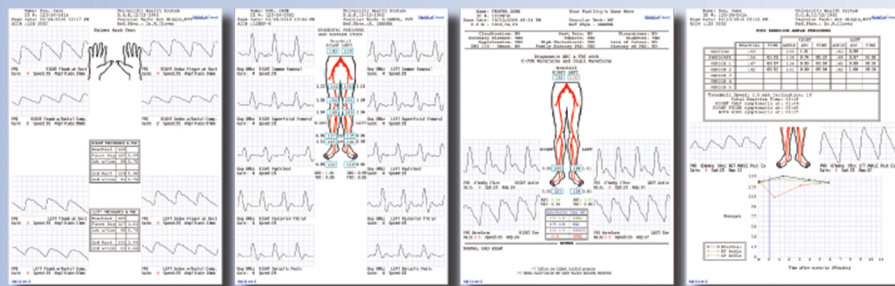

The MultiLab 2-CP-PRO offers a compact, lightweight portable vascular system. Easy to maneuver for hospital floor exams or room to room in an office. The compact size saves valuable space in your lab. Mobile vascular services can benefit from its compact size. It can easily be placed in a travel bag and moved from office to office.

The intuitive touch screen software is easy to use, improving workflow efficiency. The system performs all lower and upper vascular exams and can be customized to meet your lab's needs.

Unetixs Vascular has been an integral part of the vascular community for over 30 years. We have a large installation base throughout the USA using the 2CP system every single day.

- Now Incorporating our Automatic 12 Channel Cuff Selector
- Now Incorporating Waterproof Cuffs with Durable Bayonet Fittings
- Digital connectivity Includes PACS Reporting, Patient worklist query and SR data exchange
