

# ROODRA

## MULTILAB SERIES II

STATE OF THE ART  
NON-INVASIVE  
VASCULAR  
DIAGNOSTICS

## SEE THE DIFFERENCE

For decades, we have listened to our customers, our innovative touch screen technology is designed to create an optimal Workflow environment for exceptional performance of all vascular exams. Whatever your peripheral vascular testing equipment needs may be, you can rely on Unetixs to provide products that not only meet today's needs, but can grow to fulfill tomorrow's.

## BETTER FOR YOU & BETTER FOR YOUR PATIENTS

We believe that providing better products for physicians and sonographers mean better care for patients as well. Unetixs customers have depended on us for advanced design, a commitment to ongoing product improvement and dedication to the education and training of your staff. We believe that success is the result of quality, service and a dedication to the vascular community. We have tailored a full range of peripheral vascular testing equipment for both large or small hospital departments and outpatient offices. Our customers have trusted Unetixs for outstanding performance, reliability and custom reporting. In addition, all systems meet the demands of your lab's report connectivity by providing Dicom SR (Structured Reporting) and Modality Worklist.

# SYSTEM FEATURES

The MultiLab Series II ROODRA offers demanding vascular professionals all the advantages of a contemporary mobile platform.

Based on technologist needs, ROODRA offers up-to-date technologies that define a new standard with a sleek new look. Unetix's legendary short learning curve and ease of use remains with exciting new features and software upgrades.

Incorporating an all-in-one Windows 10 computer with a 24" screen on a flexible swing arm, ROODRA maintains Unetix's One Touch operation offering a higher degree of interface. New air hose management and storage maintains functionality and an orderly appearance.
